Energy Saving

Intelligent
Variable Frequency Booster Pump
In a different league!

Basically a domestic pressure boosting system with built-in Variable speed for constant pressure in pipe line that is in a different league!

WATER TECHNOLOGY

The pump uses permanent magnet brushless motor, imported chip, high precision pressure sensor; combined with advanced electronic control technology, it really realizes intelligent frequency conversion, constant voltage speed regulation, energy-saving and efficient high-tech products; the setting operation is very simple, no need professional people debugging, everyone can do. Let us stay in the star hotel's upscale feel.

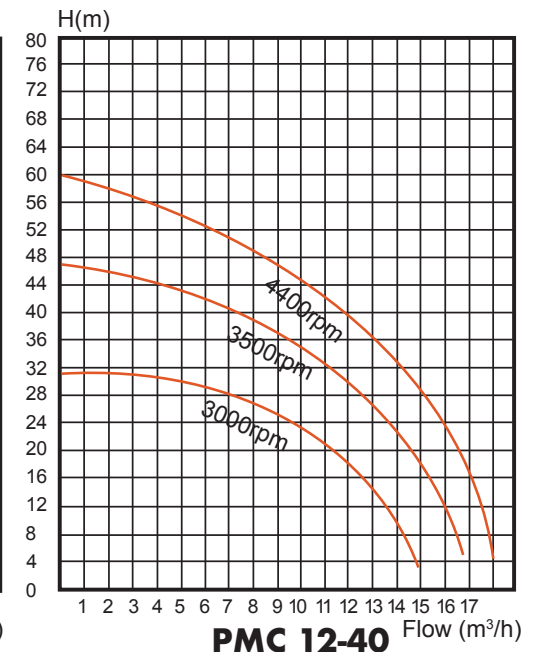

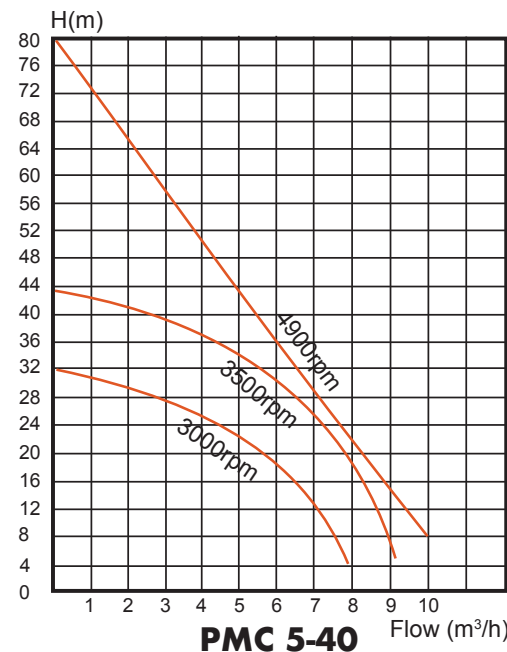

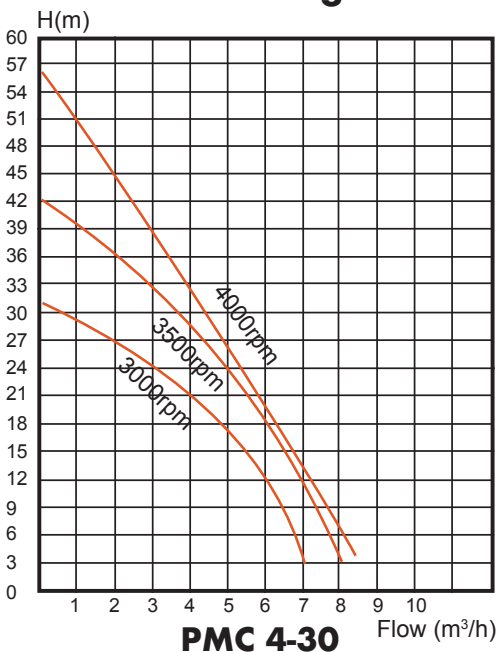

-  Low Noise
-  Super Suction
-  Wide Voltage
-  Up to 8 pumps connected in series
-  High Efficiency/ Energy-Saving
-  Intelligent/ Efficiency Constant Pressure
-  Environment Protection

Technical Data

Model	Power Range (Kw)	Max. Head (m)	Rated Head (m)	Max. Flow (m ³ /h)	Rated Flow (m ³ /h)	Max. Speed (rpm)
PMC4-30	0.9Kw	56	30	8,5	4	4000
PMC5-40	1.1Kw	80	40	10	5	4900
PMC12-40	2.2Kw	60	40	18	12	4400
